-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Objections

2. Claim 3 is objected to because of the following informalities. Appropriate correction is required.

In claim 3, line 1, the phrase "the transducer receiving station" should be changed to – said receiving station – to provide consistency. In line 3, the phrase "the transducer receiving station" should be changed to – said receiving station –.

Claim Rejections - 35 USC § 102/35 USC § 103

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 2856

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-2 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over U.S. Patent 6,363,773 (Bowers).

With regards to claims 1-3, Bowers discloses an instrument to measure fluids comprising, as illustrated in Figures 1-5, a receiving station in which an acoustic transducer is locatable to expose a front surface thereof to fluid pressure in a measurement chamber; and a pressure transfer arrangement, such as a pressurizing chamber, for communicating pressure between the measurement chamber and a rear surface of the transducer wherein a conduit is used for transferring pressurized fluid between the pressurizing chamber and the measurement chamber. Although the reference does not explicitly teaches a plurality of conduits, it is well known to an artisan in the art to have employ a plurality of conduits in lieu of one conduit to provide faster flow of fluid into the pressurizing chamber for efficiency without changing the operation and/or performance of the apparatus.

Allowable Subject Matter

6. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

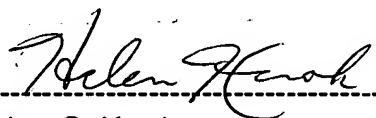

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The references cited are related to transducers mounted along a measurement chamber.
